

Saving Pictures Off of The Internet

- To save a picture onto your computer from a web page, first put the mouse pointer on top of the picture.
- Then push the right mouse button one time, in other words, right click the picture that you want to save.
- Click on the “Save Picture As” option in the menu that appears.

- When the “Save Picture” window appears, you can select the saving location by clicking on the folder in the “Save in” box at the top. Navigate to the directory (drive/folder) that you want.
- The file name can be changed by clicking in the “File name” box toward the bottom of the window. Press backspace to erase the current file name, and then type the new name.
- Finally click the save button to save the image.
