

## Student tips

You're learning on MAP Accelerator?  
Welcome! Here are six things to know.

- Your learning path is personal.** It comes from your scores on the MAP Growth test.

If you think your path is too easy or too hard, tell your teacher.

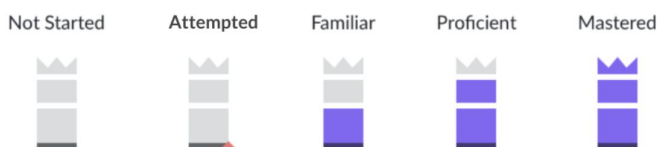

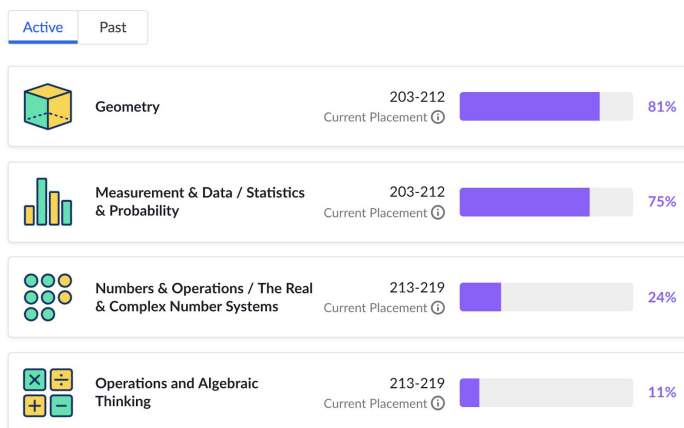

- Mastery takes time and practice.** When you get questions right, your level moves up. When you miss questions, your level moves down.

And, if you remember skills and do well in a unit test, you can move all the way to mastered status!

- Follow the blue button.** When you're learning, a blue button will help you decide what to do next.

### My MAP Accelerator

map Accelerator

**4 skills leveled up!**  
You leveled up on 4 skills and collected 80 Mastery points  
You got 9 questions correct

Skill	Level Change
Exponents (basic)	Level up
Exponents	Level up
Powers of fractions	Level up
Order of operations (no exponents)	Level up
Order of operations	Level up
Order of operations challenge	Level up

Up next for you:

**Basic ratios**

Get 5 of 7 questions to level up!

Start

0/100 points

4. **If you're lost, click the Khan Academy logo.** It's in the top center of the website.

Then, you'll be back on your learning home and ready to continue learning.

5. **If you're stuck, take a hint.** You can also use the related videos or articles or ask for help.

Students who are not afraid to take hints can learn from their mistakes and make great progress.

6. **The sky's the limit!** You can go above and beyond to make progress on MAP Accelerator.

Who knows how far you can accelerate this year?

## Stuck? Use a hint.

1 / 4

We can turn the rule into numbers and math symbols:

Rule: To find  $y$  multiply  $x$  by 2 then subtract 1.

$$x \times 2 - 1 = y$$
